

Jacked cooled submersible pumps for clean and domestic waste water.

Chromatic C250, C260

Application

Pump for pumping clean or soiled water. Cellar draining, keeping trenches, shafts and rooms dry. Domestic waste water disposal in cellar rooms (e.g. washbasins, showers, washing machines). Reduction of surface water. Emergency deployment for flooding. Water extraction from watercourses or reservoirs for irrigation. A cooling jacket with discharge connector at the top ensures sufficient motor cooling even at low water level (sip operation). Automatic ventilation with additional air vent screw. Removable strainer allows extraction of residual water down to 5 mm. Automatic purging device can be implemented.

DIN EN 12050-2: Conformity and type-tested and monitored by the LGA.

Installation: Stationary or mobile. Version with float switch for use as automatic water level controlled drainage pump.

Conveying medium: Clean or domestic waste water with solid content up to 10 mm grain size. Max. temperature of conveying medium: 35°C, briefly up to 60°C.

Operating mode: Continuous mode (S1), at medium temperature 36 - 60°C: Intermittent operation (S3 30%).

Construction

Fully submersible pump, consisting of:
Pump: Single stage centrifugal pump with vertical pressure connection and integrated non-return valve.

Impeller: Open multi-channel impeller, spherical clearance 10 mm.

Motor: Pressure watertight, medium-immersed motor. Stainless steel motor housing. Insulation class B, protection type IPX8. Thermal sensor for temperature monitoring in the winding. Connection Cable: H07RN8-F 3G1.

Shaft/Bearing: Generously-proportioned chromium steel motor shaft, permanently-lubricated roller bearing.

Seal: Shaft seal with triple radial shaft seal and ceramic-coated sealing surface.
